

Annual Coal Combustion Residual (CCR) Fugitive Dust Control Report

James De Young Generating Station

Ash Pond System

Prepared 10/18/17 by Judy N. Visscher

Actions taken 10/16 – 9/17 to control CCR fugitive dust: All the measures listed in EP-4012 Fugitive Dust Control Plan for JDY Ash Pond System (*see attached*) remain in place or have been used. The three ponds did not accept coal ash (power plant units officially retired on 6/1/17) in the past 12 months. Remediation of the adjacent coal yard began in August 2017. Some historical ash was removed from site as part of this remediation. Closure of the ash pond system is anticipated to be complete by mid 2018.

Citizen complaints regarding CCR fugitive dust received 10/16 – 9/17: There were no citizen complaints received during this period.

Summary of any corrective measures taken 10/16 - 9/17: There were no corrective actions taken during this period.
