

Coal Combustion Residuals (CCR) Rule Documents

Notice regarding Groundwater Monitoring Well installation and sampling results (*required by the CCR rules, 40 CFR 257.90 (b)*) for the Holland Board of Public Works, James De Young Generating Station, coal ash impoundment:

Holland BPW submitted and posted a notice of "intent to close" our existing ash impoundment on 3/13/17. We are currently in the midst of closing our adjacent coal yard. The groundwater monitoring wells prescribed by the CCR rule by October 17, 2017 will be installed, and sampling conducted as soon as the coal yard remediation is completed, as this is the area where the wells will need to be installed. Coal yard remediation is expected to be complete by 11/30/17.
