Term of Service:

Surcharge Customers

Customers are billed surcharges for each pollutant that exceeds the limits found in Table 1. Pollutant discharges that exceed the identified limits but are not subject to a Special Discharge Allocation will be billed as follows:

Total Surcharge = Actual Pounds Discharged above the concentrations listed in Table 1 x (Capacity Rate + Treatment Rate)

Surcharge can be billed for either BOD or COD, whichever is the greater dollar cost, but not for both.

Special Discharge Allocation (SDA) Customers

SDAs are special permitted limits on the daily pounds of a pollutant that can be discharged by a customer. These allocations are assigned to customers via their discharge permit. For each pollutant subject to a Special Discharge Allocation, customers will be billed the combined total of the following:

Capacity Charge = (SDA lbs/day x days per billing cycle) x Capacity Rate

Treatment Charge = Pounds Discharged above the concentrations listed in Table 1 x Treatment Rate

Over Capacity Charge = Actual Pounds discharged above the (SDA x days per billing cycle) x Capacity Rate

Over Capacity Charge is only applied if a customer's actual pounds discharged exceeds their permitted SDA.

TABLE 1	
POLLUTANT	SURCHARGE ABOVE
Biochemical Oxygen Demand (BOD)	250 mg/L
Chemical Oxygen Demand (COD)	500 mg/L
Total Suspended Solids (TSS)	250 mg/L
Total Phosphorus (TP)	5 mg/L
Grease & Oil Polar Fraction (G&O)*	50 mg/L

*Surcharges for grease and oil polar fraction will be applied only if a user has received a Special Discharge Allocation for grease and oil polar fraction. Any users discharging above 50 mg/L may be required to submit grease trap maintenance records.
